## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133)
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Amendment*

1. The amendment filed on 4/18/03 has been entered and claims 6-8 and 25 have been cancelled. And the indicated allowability of claims 1, 3-5 is withdrawn in view of the newly discovered reference(s) to Fujii et al. US PG-Pub 2003/0052869. Rejections based on the newly cited reference(s) follow.

### *Priority*

2. Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a translation of the foreign application should be submitted under 37 CFR 1.55 in reply to this action.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1, 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujii et al.

US PG-Pub 2003/0052869.

Art Unit: 2826

Fujii et al disclose in figs. 1, 7-10 an organic EL device, comprising a thin film transistor (TFT) array substrate including a first insulating substrate 21, a TFT 22 with a conductive interface pad 66 connected thereto and a capacitor 35 formed on the first insulating substrate; and an organic EL substrate including a second insulating substrate 29, a transparent electrode 65, an organic EL layer 60 and a metal electrode 61, wherein the conductive interface pad is directly connected to the metal electrode.

As to claim 3, Fujii et al disclose protection film 77 that prevents external oxygen and moisture from permeating.

As to claim 4, said protection film being formed by depositing a SiNx layer and a SiO<sub>2</sub> layer at least once refers to a process and "product by process" claims are directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15 at 17 (footnote 3). See also In re Brown, 173 USPQ 685 and In re Thorpe, 227 USPQ 964, 966. Therefore, the way the product was made does not carry any patentable weight as long as the claims are directed to a device. Further, note that the applicant has the burden of proof in such cases, as the above case law makes clear. Also see MPEP 2113.

As to claim 5, Fujii et al disclose (see fig. 40 and page 25, pars. 0412-0413) a TFT array substrate and the organic EL substrate being sealed by a UV-curable agent.

***Allowable Subject Matter***

5. Claims 9-12 are allowed.

Art Unit: 2826

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. KUBO et al. (JP 11-101992) disclose an LCD with an enhanced luminance.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Sefer whose telephone number is (703) 605-1227.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (703) 308-6601.
